

Architects claim top hotel crown

THE architects behind The Milton, DBI Design, have won the award for World's Leading New Hotel at the World Travel Awards held in Qatar.

DBI Design won for their billion-dollar Abu Dhabi development The Jumeirah at Etihad Towers. Managing director Warren Coyle said the award was recognition for the skill that existed in Brisbane.

"The development's design went up against some of the world's best and won," he said.

"(Most) of our architectural design and engineering work was done right here in Brisbane, so it really does show the talent we have in Queensland. We can design projects that truly are world-leading."
